

YASH PAKALE

Pune, Maharashtra, India

Phone: +91 82080 27577 | yashpakale99@gmail.com | linkedin.com/in/yash-pakale | github.com/Yash151005 | yash151005.github.io

Professional Summary

Artificial Intelligence and Data Science undergraduate with strong experience building production-grade ML systems, computer vision solutions, and full-stack applications. Proven ability to design scalable AI pipelines, REST APIs, and real-world systems using Python, YOLO, MERN stack, and cloud-ready architectures.

Education

Vishwakarma Institute of Information Technology (VIIT)

2024 – 2027

Bachelor of Technology in Artificial Intelligence & Data Science

Pune, Maharashtra

Government Polytechnic Solapur

2021 – 2024

Diploma in Computer Technology

Solapur, Maharashtra

Kai. Ravsaheb Patil Secondary School

Senior Secondary Education

Paranda, Maharashtra

Technical Skills

Programming Languages: Python, JavaScript, SQL, HTML, CSS

AI & Machine Learning: Machine Learning, Computer Vision, YOLO Object Detection, Deep Learning, Model Evaluation, Feature Engineering, Data Preprocessing, Bias Analysis, Fairness Metrics, Predictive Analytics

Web Development: React.js, Node.js, RESTful APIs, Bootstrap, Express.js, Authentication Systems, Real-time Data Handling, Responsive Design, Full-Stack Development

Databases: MongoDB, MySQL, Database Design, Query Optimization

Tools & Technologies: Git, GitHub, Docker, Postman, Jupyter Notebook, VS Code, CI/CD Basics, API Testing, Linux Basics

Data Science: Data Analysis, Statistical Analysis, Data Pipelines, Data Engineering, ETL Processes, Data Visualization

Algorithms & DS: Data Structures, Algorithm Design, Problem Solving, Competitive Programming, System Design

Projects

AutoFix AI | Python, YOLO, Computer Vision, Machine Learning, Model Deployment

GitHub: Yash151005/AutofixAI

- Built end-to-end vehicle damage detection system using YOLO for automated insurance and repair assessment
- Designed real-time computer vision pipeline for damage localization and cost estimation from images
- Optimized model performance through feature engineering and tuning for accurate damage classification

SafeRoute.AI | Python, Machine Learning, Data Engineering, REST APIs, Predictive Analytics

GitHub: Yash151005/Real-Time-Route-Safety-Scoring-System-for-Pedestrians-or-Vehicles

- Developed ML-based route safety scoring system using crime, temporal, and environmental data
- Built scalable data pipelines and REST APIs for real-time safety prediction and integration
- Applied statistical analysis and ML models to uncover safety patterns across locations and time

ReliefReach AI | Python, Predictive ML, Data Pipelines, Cloud Architecture, APIs

GitHub: Yash151005/ReliefReach-AI

- Designed AI-driven disaster response platform for impact prediction and resource optimization
- Built cloud-ready data pipelines processing satellite, weather, and ground-level inputs
- Engineered scalable architecture for low-latency predictions during high-volume disaster events

BiasScope | Python, ML Evaluation, Fairness Metrics, Statistical Analysis, Data Visualization

GitHub: Yash151005/BiasScope

- Built ML bias evaluation tool using industry-standard fairness metrics across demographic groups
- Implemented bias detection methods including disparate impact and demographic parity
- Developed interactive visualizations to help teams identify and mitigate algorithmic bias

TeamSync | React.js, Node.js, MongoDB, REST APIs, Authentication, Recommendation Systems

GitHub: Yash151005/TeamSync

- Developed full-stack hackathon team discovery platform using MERN stack
- Implemented OTP-based authentication and intelligent skill-based matching algorithms
- Built responsive, mobile-first UI with scalable backend and recommendation logic

Freelance Bidding Platform | *MERN Stack, Node.js, React.js, MongoDB, REST APIs, Algorithms*

GitHub: [Yash151005/Freelance-bidding-platform](#)

- Built MERN-based freelance marketplace with intelligent auction-driven bid selection
- Designed multi-criteria bidding algorithm considering price, quality, timeline, and ratings
- Implemented scalable database schema for users, projects, bids, and transactions

Accomplishments & Certifications

1st Place in AIForge Hackathon | *Vishwakarma Institute of Technology, Pune*

2nd place in Open Innovation Hackathon | *GDCE PES's Modern Collage of Engineering, Pune*

2nd Place, GDG Generative AI Quiz | *Google Developer Groups*

3rd Place, State-Level Engineers' Day Quiz | *Institution of Engineers India, Latur*

Top 10% Among 5500 Innovators | *Mumbai hacks , Mumbai*

Artificial Intelligence Bootcamp | *C-DAC Pune*

Additional Interests

Areas of Interest: AI/ML, Computer Vision, NLP, Full-Stack Development, Cloud and DevOps, System Design, Open Source
